

ULISSES XAVIER

Software Developer

(92) 984253526

Ulissexavier37@gmail.com

ABOUT ME

Developer focused on building complete applications, with primary experience in Flutter and backend integration (Firebase and REST APIs).

PROJECTS

STORIA – WEBNOVEL READING AND PUBLISHING PLATFORM

Full-stack application developed in Flutter with focus on user experience, content organization, and backend integration.

- Modular architecture with separation of responsibilities (models, repositories, and state management)
- Backend integration using Firebase (Firestore, Authentication, and Storage)
- Implementation of auto-save with debounce to improve reliability and user experience
- Persistence of user preferences using SharedPreferences
- Development of a web dashboard for content management
- Experience structuring and maintaining a real-world application with multiple features
